About US Saudi Gulf Group

Established 25 years ago in Riyadh, Saudi Arabia, Saudi Gulf Group has grown into a leading company specializing in construction, contracting, development management, engineering consultancy, BIM Services, and maintenance. With a proven track record of excellence, we have achieved second-category classification and managed projects exceeding 8 billion SAR in total business volume.

We take pride in offering comprehensive, BIM-integrated services, covering architectural, structural, and interior design, as well as IT solutions and high-end décor. Our team consists of highly skilled professionals, including civil engineers, management engineers, and maintenance specialists, ensuring the highest standards of quality and efficiency in every project

Over the years, we have successfully delivered projects across various sectors, including:

- **Luxury Palaces & Private Villas**
- **Commercial Centers & Retail Spaces**
- **Restaurants & Cafeterias**
- **Hospitals & Healthcare Facilities**
- **Corporate Offices & Administrative Buildings**
- **Educational Institutions & Public Facilities**

At Saudi Gulf Group, our commitment to innovation, quality, and client satisfaction drives our continued success in shaping the built environment of Saudi Arabia.

Overview of Company

At Saudi Gulf Group, our mission is to enhance people's lives by delivering smart, efficient, and financially viable solutions that make everyday living happier, easier, and more productive

We are committed to providing integrated facilities management and general maintenance services of the highest standards. Through our expertise and exceptional team, we strive to build lasting relationships with our clients, earning their trust through reliability, innovation, and excellence.

Vision of Company

We aspire to be a leading company in our field, setting new benchmarks for quality, efficiency, and customer satisfaction. Our goal is to deliver superior services within the shortest timeframes, ensuring exceptional quality and value for our clients.

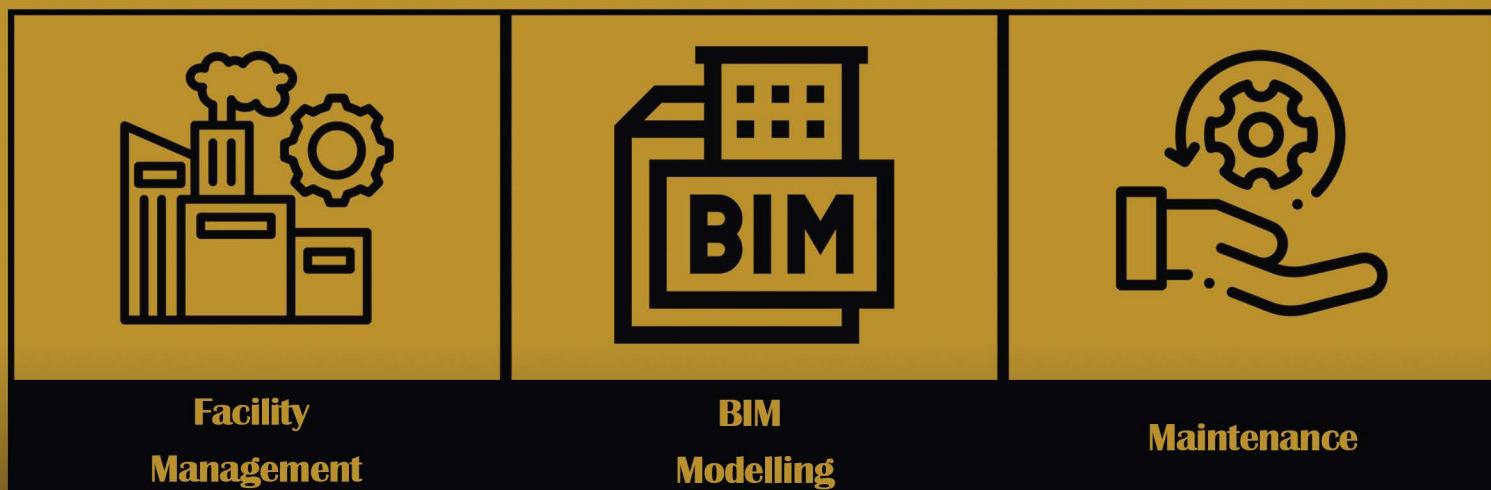

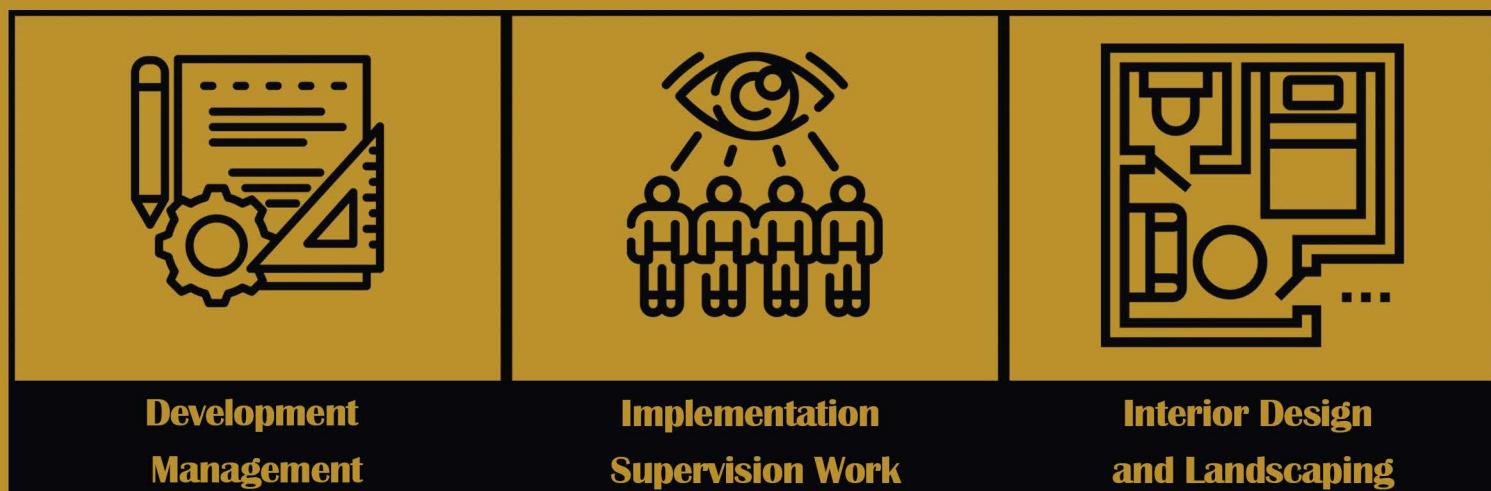

Quality

Honestly, Integrity, and Dictation in work, and performing the work in timely manner with high quality.

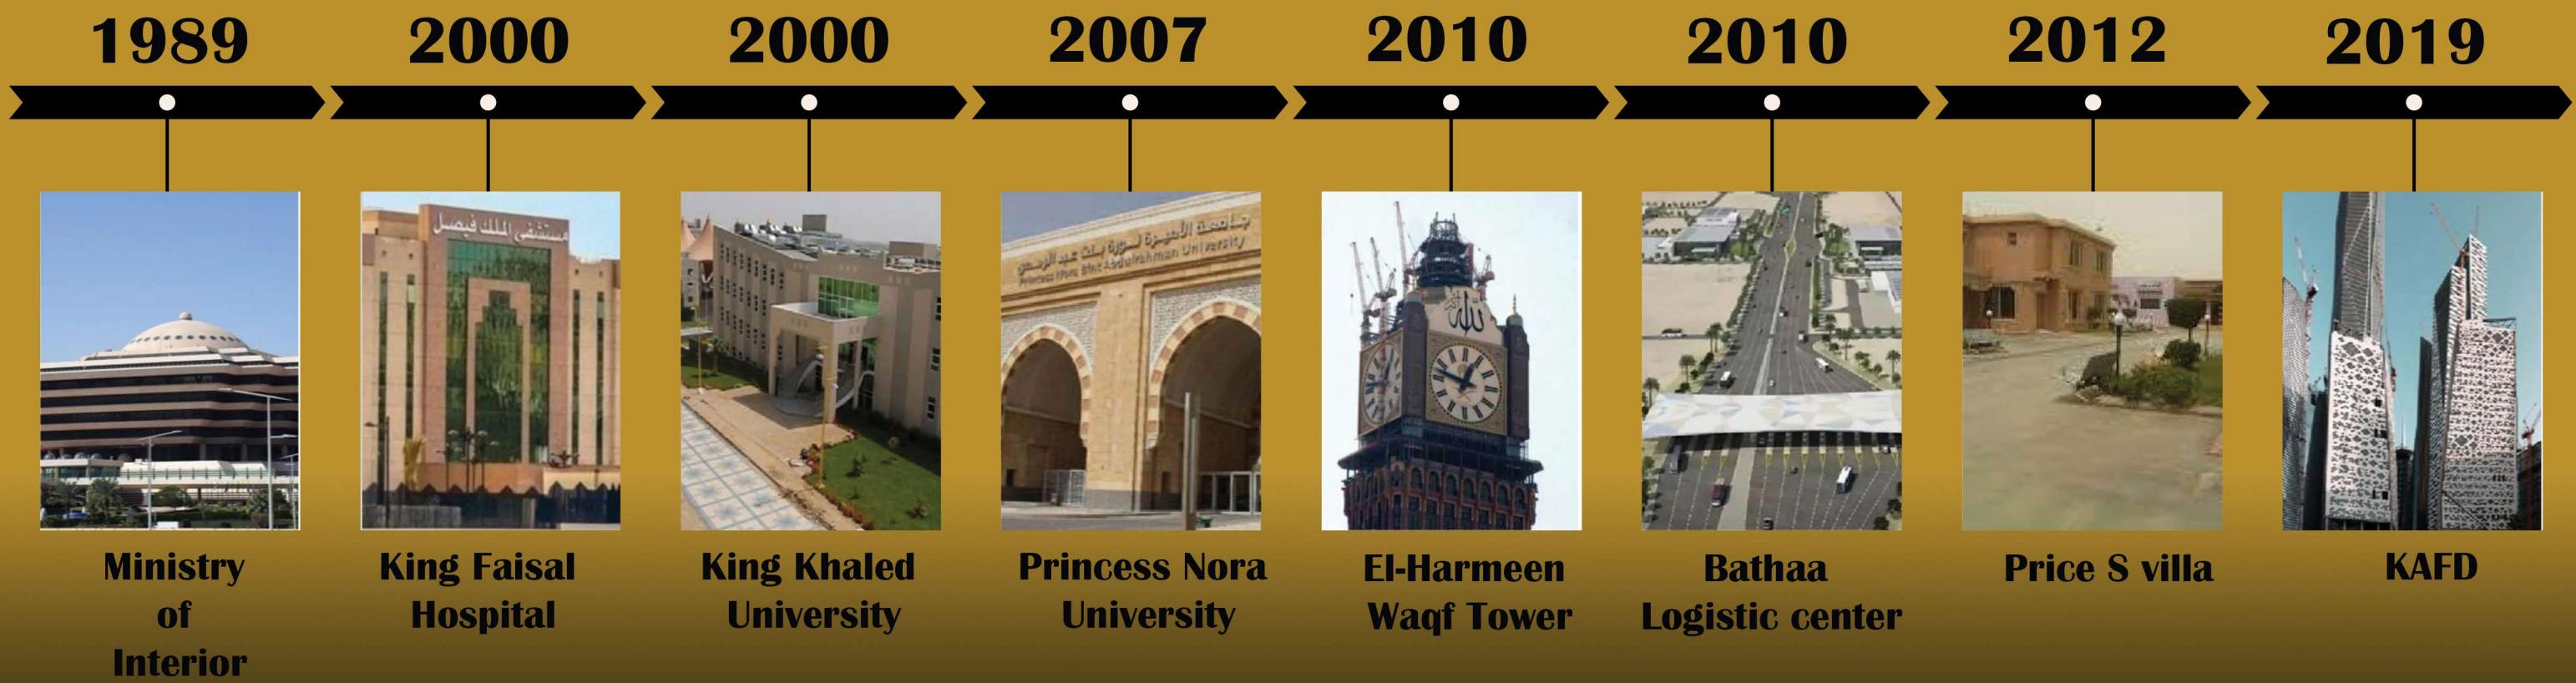

Our Services

Our Services

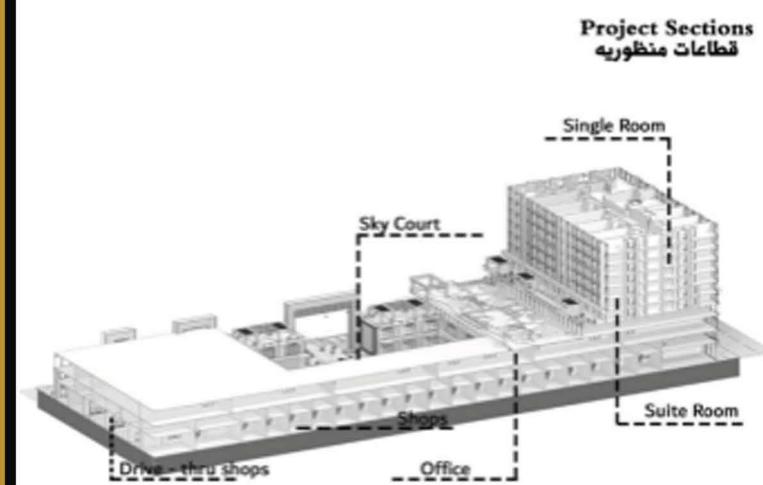

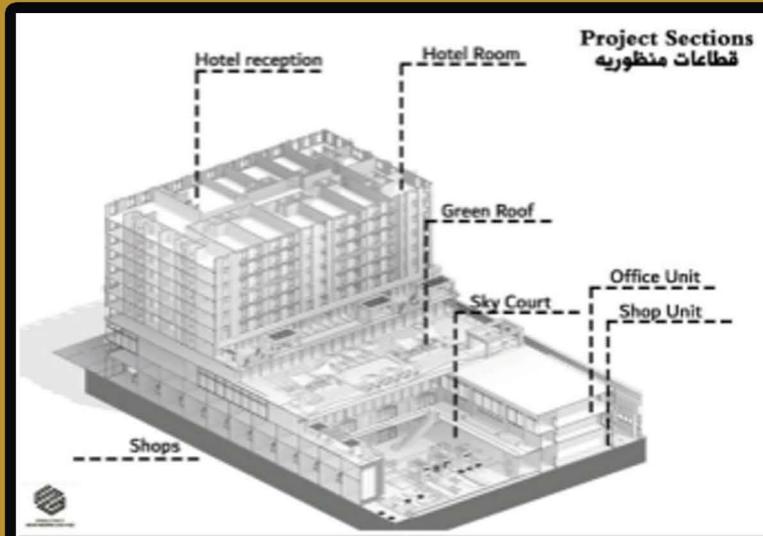

SG Engineering & Contracting Company was established 25 years ago and has since proven itself as one of the leading companies in the construction sector. Over the years, the company has focused on providing comprehensive and integrated solutions for a wide range of projects, from residential and administrative to commercial and educational, including university construction. Throughout its journey, SG has reached several key milestones that enabled its growth and development in the construction market. Thanks to its commitment to quality and professionalism, the company has achieved successive successes, leading to its classification as a second-category contractor with a large volume of work. SG has distinguished itself by its ability to deliver diverse projects that meet the needs of clients across various sectors, earning a strong and reliable reputation in the market and becoming a preferred partner for many government and private entities.

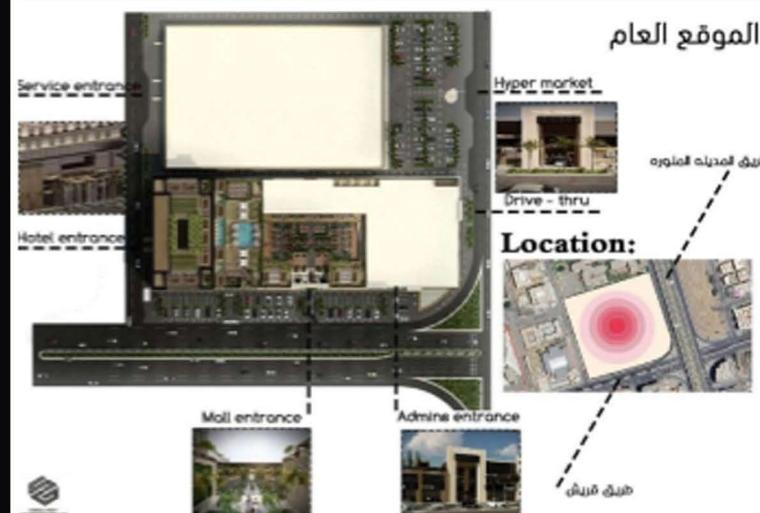

A white van is driving away from the viewer on a road that cuts through a rural landscape. The road is flanked by green grass and shrubs. In the background, there are rolling hills under a sky filled with soft, white clouds. The overall scene is peaceful and suggests a journey or travel.

- 7. Project Handover:** Ensuring all requirements are met before delivery

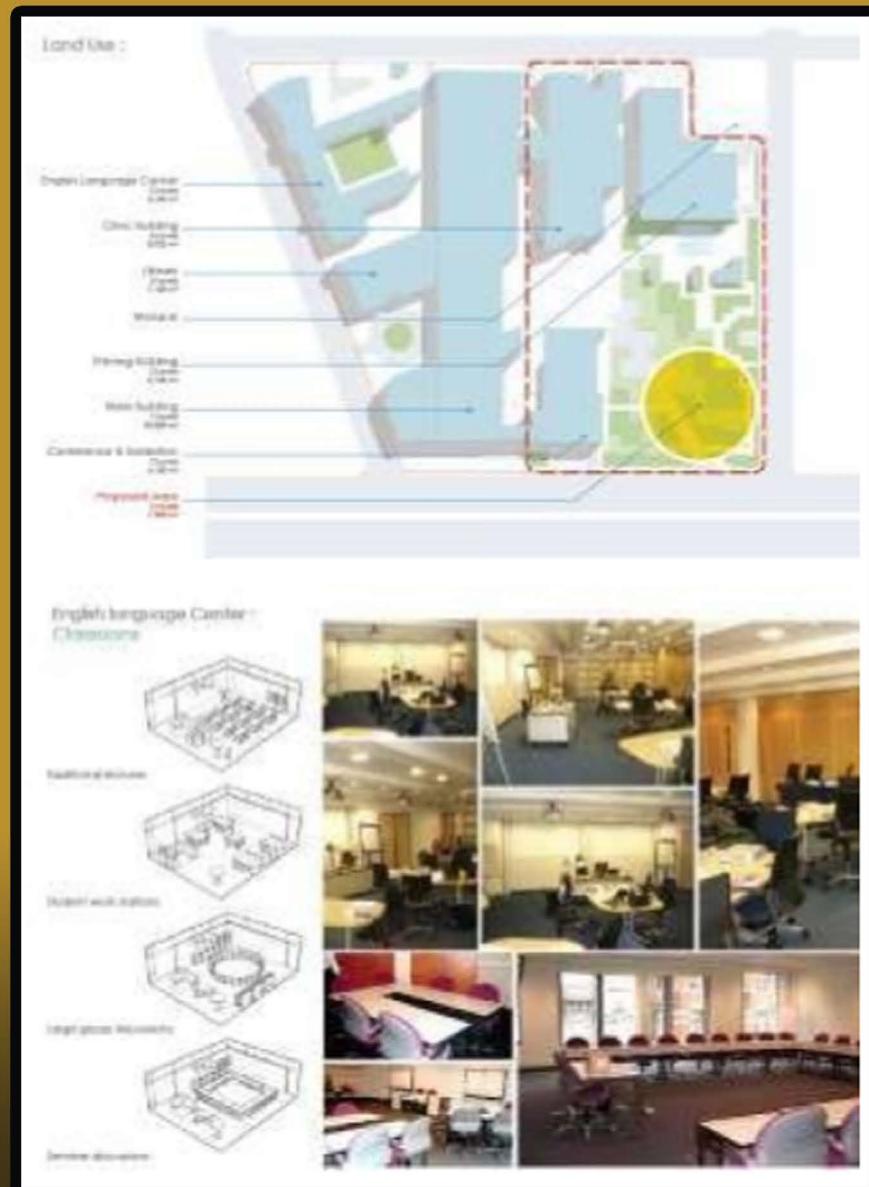

English Language Center and Central Library at the Institute of Public Administration in Riyadh

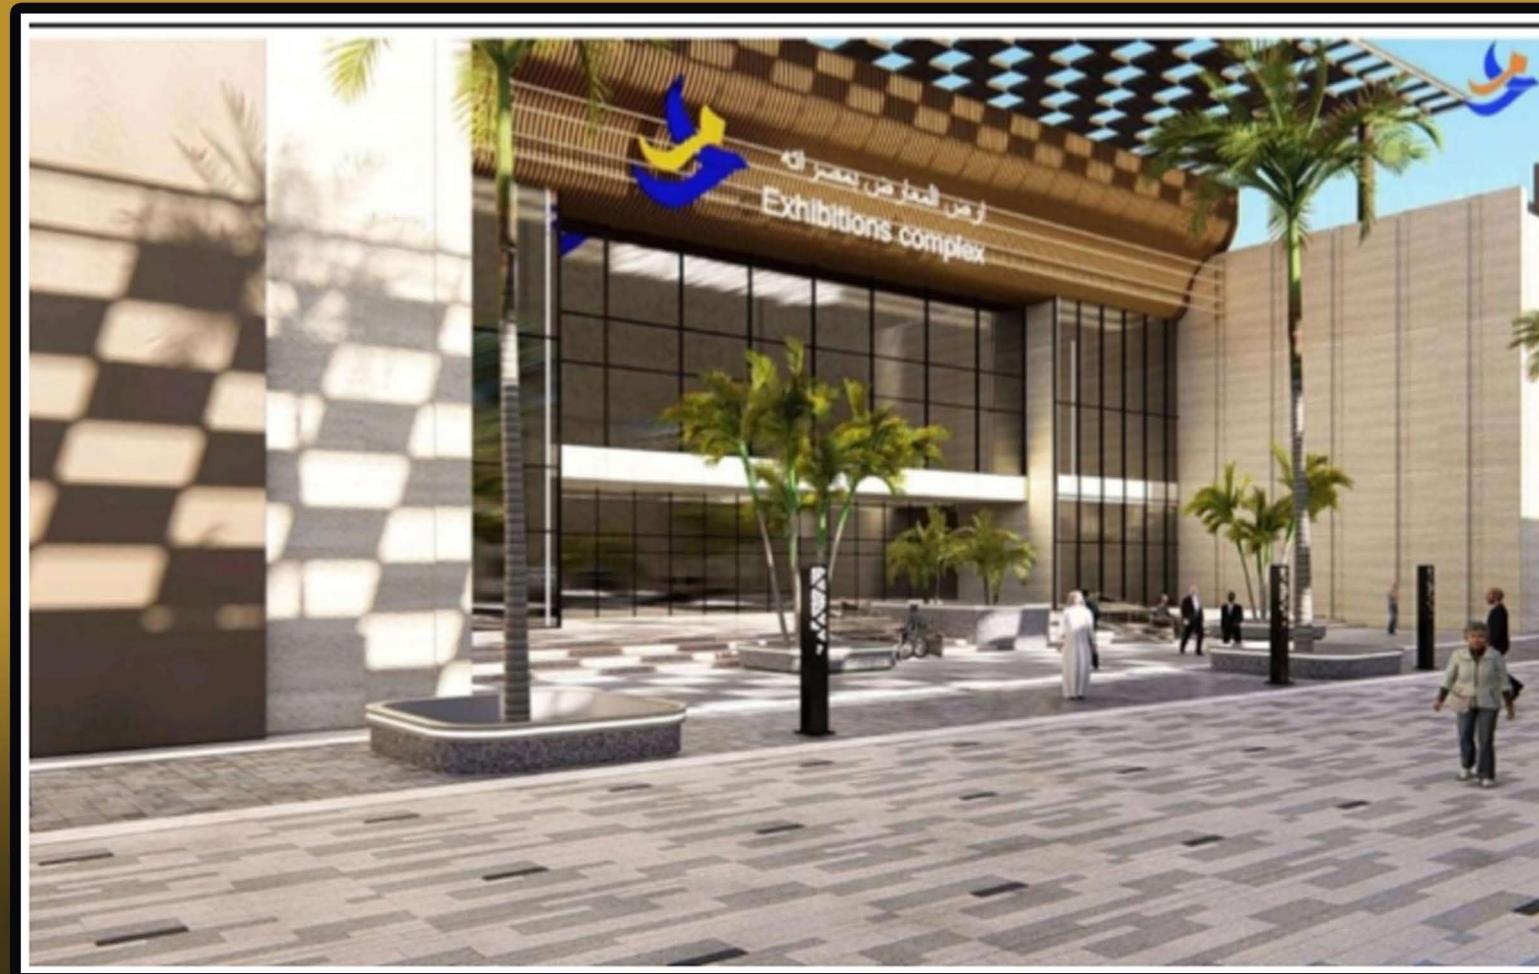

English Language Center and Central Library at the Institute of Public Administration in Riyadh, we played a crucial role in project management, design coordination, and the preparation of tender documents. Project Management: We developed a comprehensive plan that included timelines and budgets, conducting regular meetings with all stakeholders to ensure effective communication and ongoing updates. Design Coordination: We facilitated collaboration among various teams to ensure design alignment with the institute's requirements, conducting regular reviews of plans to maintain quality. Preparation of Tender Documents: We prepared the necessary technical and administrative tender documents, including specifications, schedules, and budget details, adhering to the highest standards of transparency. Our efforts contributed to achieving the institute's vision of providing an advanced educational center that meets the needs of students and staff.

Comprehensive BIM Modelling services covering all disciplines — Architecture, Structural, and MEP — delivered from LOD 100 through LOD 500, ensuring full lifecycle development from conceptual design to as-built documentation.

نيوم NEOM

Logistic Hub, Sindalah Island, Neom

The Logistic Hub project on Sindalah Island, NEOM, Saudi Arabia, SG Contracting Company played a vital role by providing comprehensive consultancy services to the main contractor,

Al Muhaleb. Our expertise spanned a wide range of technical and support functions, including:

Technical Office Services:

We offered detailed planning, Shop- drawings coordination, and project management to ensure the smooth progression of

all construction phases. Design Services: Our team worked on creating and refining designs that met the specific needs of

the project while adhering to NEOM's high standards for innovation and sustainability.

BIM (Building Information Modelling)

Services: By utilizing advanced BIM technology, we ensured seamless collaboration between all stakeholders,

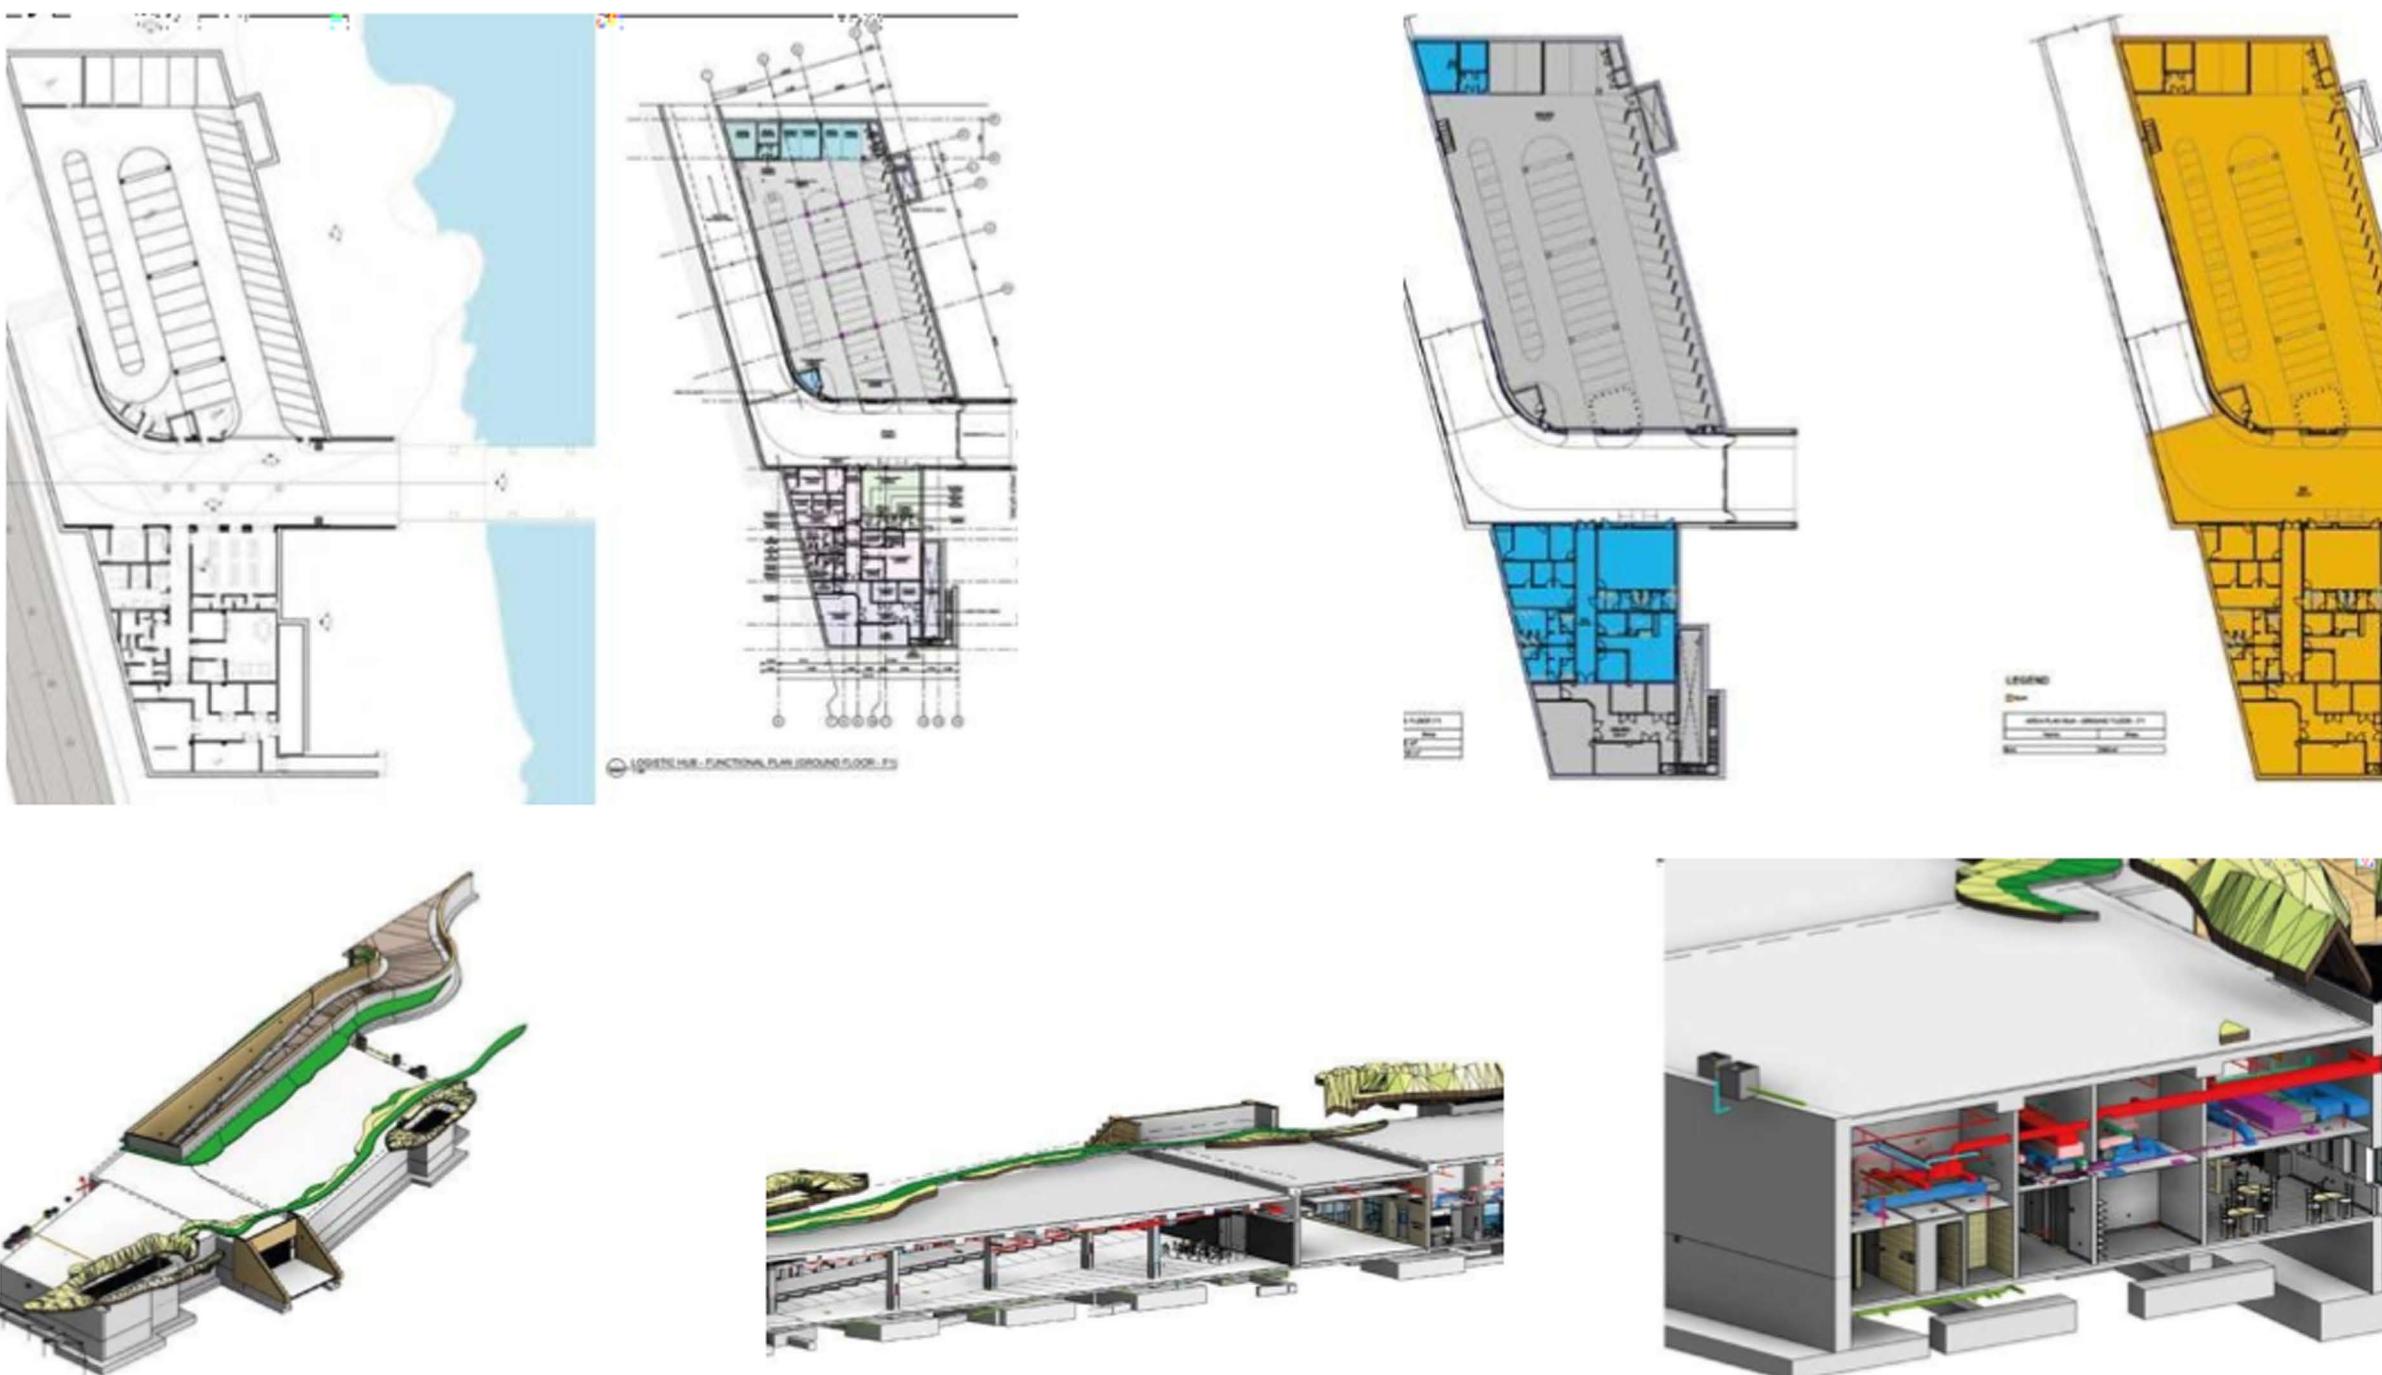

enabling precise 3D modelling and efficient management of the project's lifecycle. Through these services, SG contributed to the success of the Logistic Hub, ensuring it met both the functional requirements and the

ambitious vision of NEOM.

INTRODUCTION

The project aims to establish a temporary residential community with integrated services, providing an ideal living and working environment through a plan that balances residential uses, vistas, and public spaces. It includes a central service area with a Mosque, clinic, market, restaurant, sports plaza, parking, and amenities. The masterplan is divided according to user categories into zones for workers, supervisors, employees, engineers, and their families. The central area is designed in a central zone to ensure quick access for all users and serves as a semi-public area, providing privacy and tranquility within each zone, while considering the orientation of facilities to align with wind directions and maximize environmental benefits.

Tabuk NEOM**

Backbone Office building, sharma, Tabuk NEOM

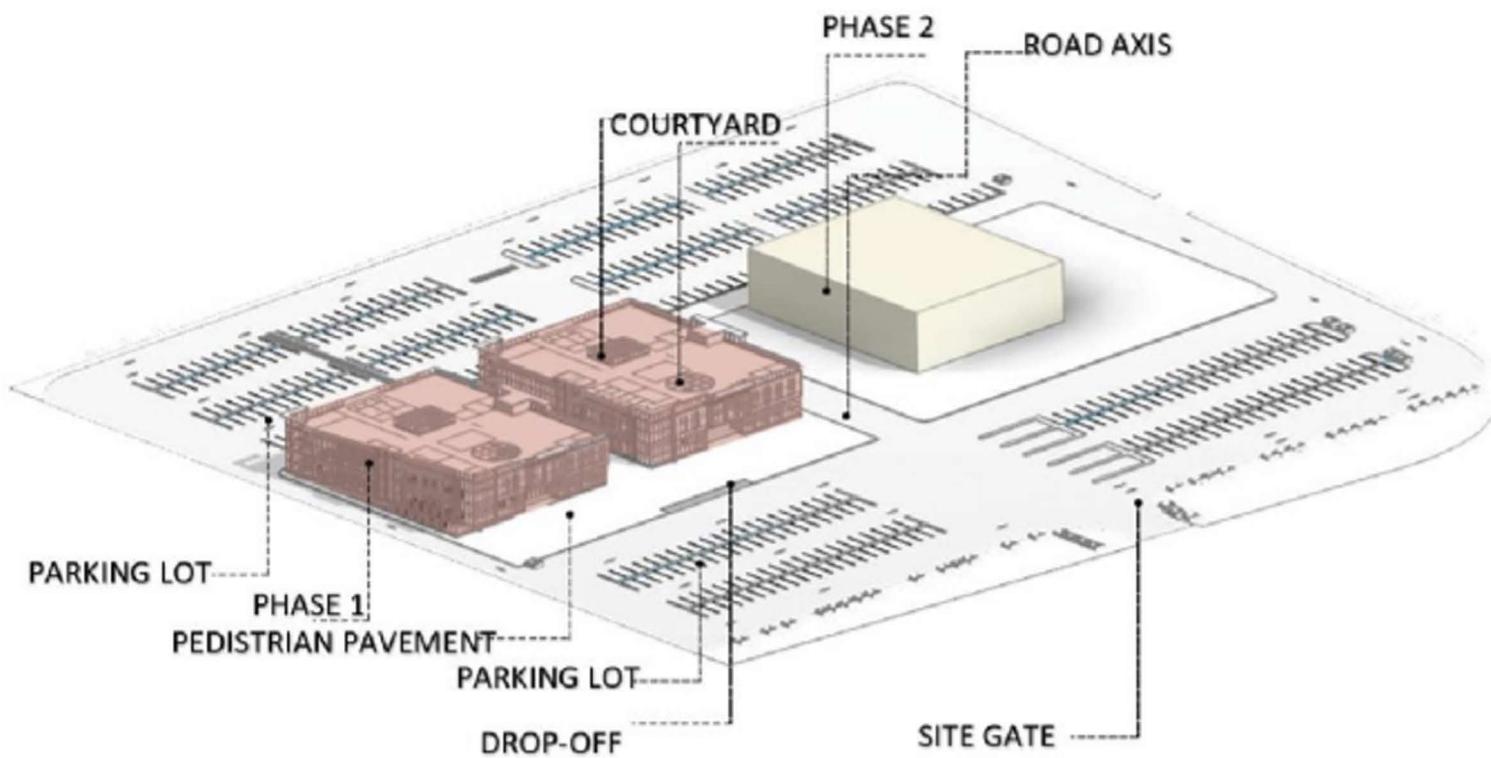

The Backbone Office Buildings Project in Sharma, Tabuk, Saudi Arabia, SG playing a key role in providing design, technical support, and supervision services. The project involves the design and construction of two office buildings with a total built-up area of 10,000 square meters on a 24,000 square meter plot of land. Our role included:

Design Services: We developed comprehensive designs that meet the project's needs, focusing on administrative and office functions, while adhering to the highest standards of quality and efficiency.

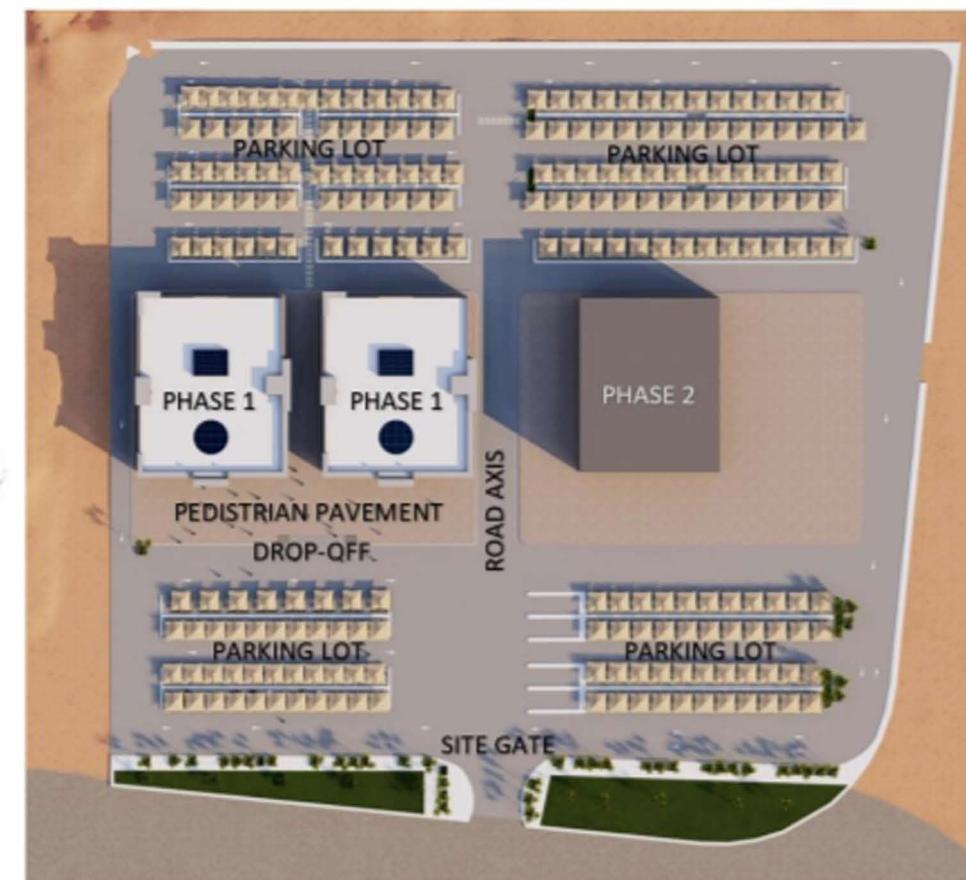

Technical Support Services: We provided precise technical consultations to ensure efficient implementation of the designs, addressing any technical challenges the project might face.

Supervision Services: We took charge of supervising all construction phases to ensure that the work was executed according to the schedule and the specified technical requirements while ensuring compliance with engineering and quality standards. Through these services, SG contributed significantly to the project's progress and ensured its delivery to the highest standards.
